LIFE SCIENCES EDITORIAL POLICY

LIFE SCIENCES was founded with the intention that scientific reports would be published expeditiously, within weeks of acceptance. *LIFE SCIENCES* has adhered to its original objective by keeping abreast of current advances in communication and publication technologies to rapidly disseminate new and significant information in pharmacology.

SCOPE OF THE JOURNAL

LIFE SCIENCES is an international weekly journal publishing full length reports on research in a range of areas in the life sciences. These areas include molecular and cellular aspects of:

- Cardiovascular & Autonomic Mechanisms
- Endocrinology
- Immunology
- Toxicology
- Drug Metabolism
- Growth Factors & Neoplasia
- Neuroscience

The journal publishes original research rapidly. Although full-length manuscripts are favored, exciting new results requiring rapid dissemination in shorter form will also be considered. These shorter submissions may be considered for either *LIFE SCIENCES* or for the ultra-rapid communications section *Pharmacology Letters.*

The journal favors publication of papers on seminal areas of science utilizing modern scientific technologies and exploring molecular and/or cellular mechanisms involved in explaining reported observations. Recommendations from the Declaration of Helsinki or NIH guidelines for care and use of laboratory animals must be adhered to. All communications will be rigorously reviewed. Submitted reports will be processed by a section editor.

activating protein-1, in human lung 1147
activation, factors of NADPH oxidase 1 *minireview*
acute renal failure, TAK-044 on 301
adenosine A_1 receptor, and cough reflex PL-383
adenosine antagonist, and cerebroprotective activity of CGS 15943 PL-61
adenosine antagonists, KW-3902 on phosphate transport 839
adenosine transporter, binding sites in human parietal cortex 1675
adenosine triphosphatases, aging and diabetes on 1261
adenylate cyclase, and 5-HT stimulation of cAMP in ganglia 685
adenylate cyclase, neuroblastoma cells and dopamine D2 receptors 1887
adenylyl cyclase, dopamine D_2 receptors and 7-OH-DPAT PL-257
ADP-ribosylation, METH and reactive gliosis PL-51
adrenal, stress hormones and plasma cholesterol 1617
adrenal ANF receptors, modulation ANF effects by pregnancy PL-169
adrenal gland, and Et-1 binding sites in infarcted rats PL-421
adrenalcortical function, neurotensin and ACTH release 201
adrenergic agonists, potentiation of methylphenidate hepatotoxicity 269
α_1-adrenergic receptor, kinetic studies of aortic contractility 807
β-adrenergic agonist, potassium channel and bronchodilation PL-217
α-adrenoceptor, prenatal cocaine exposure on aorta 1327
α_1-adrenoceptors, prazosin, and diaspirin crosslinked hemoglobin 121
adrenocorticotropic hormone, stress and ebiratide on ethanol consumption 873
adrenomedullin, vascular responses to PL-251
adrenomedullin, vasodilator effects PL-85
adrenomedullin 15-52, on hindlimb vascular resistance PL-85
adrenomedullin 15-52, vascular responses to PL-251
aerobatics, on plasma magnesium fractions PL-327
affinity purification, of sigma receptor PL-151
age, and diabetes on microvessel ATPases 1261
age, related changes in tissue content of MDA proteins 1561

**ARBD symp.*: Novel Treatments of Age-related Brain Disorders, Heidelberg, Germany September 9-11, 1993

age-related brain disorders, glutamatergic treatment in 2147 *ARBD Symp.*
aged rats, changes in receptor binding in 1585
aging, and chronopharmacology of spironolactone 311

SCOPE OF THE JOURNAL

LIFE SCIENCES is an international weekly journal publishing full-length reports on research in a range of areas in the life sciences. These areas include molecular and cellular aspects of:

- Cardiovascular & Autonomic Mechanisms
- Drug Metabolism
- Endocrinology
- Growth Factors & Neoplasia
- Immunology
- Neuroscience
- Toxicology

The journal publishes original research rapidly. Although full-length manuscripts are favored, exciting new results requiring rapid dissemination in shorter form will also be considered. These shorter submissions may be considered for either LIFE SCIENCES or for the ultra-rapid communications section *Pharmacology Letters.*

The journal favors publication of papers on seminal areas of science utilizing modern scientific technologies and exploring molecular and/or cellular mechanisms involved in explaining reported observations. Recommendations from the Declaration of Helsinki or NIH guidelines for care and use of laboratory animals must be adhered to. All communications will be rigorously reviewed. Submitted reports will be processed by a section editor.

INSTRUCTIONS TO AUTHORS

LIFE SCIENCES and *Pharmacology Letters* Section

Contributions are reviewed and accepted on the basis of their scientific merit and the need for rapid publication. Contained in the journal:

- New scientific information
- Relevant clinical discoveries
- Minireviews on selected aspects of a scientific field undergoing rapid change
- Collections of selected papers on current concepts in a particular field
- Brief conceptual papers based on original and/or literature data
- Symposium papers

SUBMISSIONS: When sending by mail, submit an original and two copies of the manuscript. Submissions by facsimile are also accepted; follow with a hard copy, original figures and a cover letter stating your article has been previously submitted by facsimile. Original manuscripts will not be returned in order to reduce mailing costs.

COMPUTER DISKS: Upon acceptance, authors are requested to submit a computer disk containing the final version of their paper along with the final manuscript to the editorial office. Please do the following: (1) Specify which word processing software (including which release) was used to prepare the document (e.g., WordPerfect 6.0); (2) Specify what computer was used; (3) Include both original file and ASCII file on the disk; (4) Keep a backup disk for reference and safety.

SECTION HEADING SELECTION: At the top right of each manuscript, in pen or pencil, indicate under which section heading the manuscript should be considered: Cardiovascular and Autonomic Mechanisms; Drug Metabolism; Endocrinology; Neuroscience; Toxicology; Growth Factors and Neoplasia; Immunology. *Pharmacology Letters* articles will be considered separately and must conform to the instructions for these submissions printed below.

SUGGESTED REFEREES: To expedite the review process, authors should submit names of four qualified reviewers for their work, including addresses and, if possible, facsimile numbers. Suggested referees should not be from the same institution as the author(s) to avoid conflict of interest. Each reviewer should be an expert in the field of the manuscript. It is not necessary to choose referees from the Editorial Advisory Board unless those individuals are familiar with the topic of the submitted article. *Pharmacology Letters:* suggested referees are a requirement for submission.

PHARMACOLOGY LETTERS is a section providing for the rapid review and publication in English of original research involving rigorous experimental studies of immediate interest on any aspect of basic pharmacology. Clinical studies will be included if they have a direct bearing on the mechanism of drug action. Also invited are commentaries, new methodologies and manuscripts on pharmacologic theory (either conceptual or mathematical). It is recommended that articles are no longer than 6 pages, with a maximum figure-plus-table combination of 4, and no more than 20 references. Be sure to include suggested referees as noted in the paragraph above.

TYPING INSTRUCTIONS: The following detailed instructions are necessary to allow direct reproduction of the manuscript for rapid publishing. *If instructions are not followed, the manuscript will be returned for retyping.* To enhance the presentation of the Journal, we encourage you to work with us to achieve a pleasing uniformity of typeface and layout; however, it is not our intention to place restrictions on authors who do not have access to state-of-the-art printing capabilities. The following typefaces, in 12 point size, are preferred: Times Roman, Helvetica, Courier. Table and figure legends should be easily discernible from the text. Small italic typefaces are unsuitable. It is imperative that manuscripts are typed with a black carbon ribbon, or ink-jet or laser printer; this insures a superior quality reproduction in the photo-offset process. Dot matrix print is not acceptable. No erasure marks, smudges, spots, pencil or ink corrections or creases are allowed.

FORMAT FOR *PHARMACOLOGY LETTERS* SECTION: Observe "General Format" and "Title" on these Instructions. Following the author paragraph, *quadruple space,* then type a black line across the entire width of text. On the first line below the black line, at left margin, type: Abstract. Continue on the same line with a statement summarizing the important points of the text. The abstract paragraph should extend across the entire width of text. Under the abstract, type another black line across the width of text. *Double-space* below the black line, and type Introduction (underlined and centered over text). Continue with Instructions beginning with "Major Headings".

GENERAL FORMAT: Paper size should be 8 1/2" (216mm) by 11" (279mm) and the typing area must be exactly 6 5/8" (168mm) wide by 9 7/8" (250mm) long. Justify margins left and right (block format). The entire typing area of each page must be filled, leaving no wasted space. Text should be *single-spaced* on good quality white bond paper, and *double-spaced* between paragraphs. Special care should be taken to insure that symbols, superscripts and subscripts are legible and do not overlap onto lines above or below. Make sure text lines are equidistant.

TITLE: On the first page of the manuscript, start title 1" (25mm) down from top text margin. Type title in all capital letters, centered on the width of the typing area and single-spaced if more than one line is required. The title should be brief, descriptive and have all words spelled out. *Double-space,* then type the author(s) name(s), single-spaced if more than one line is required. *Double-space*, then type author(s) address(es), also single-spaced, capitalizing first letters of main words. *Quadruple-space* before Summary (LIFE SCIENCES) or Abstract (*Pharmacology Letters*).

SUMMARY: (for LIFE SCIENCES) Center, type and underline summary heading, capitalizing the first letter. A *double-space* should separate the heading from the summary text. Indent summary text approximately 1/2" (13mm) from both left and right margins. The summary should be intelligible to the reader without reference to the body of the paper and be suitable for reproduction by abstracting services. Introduction to the text (without a heading) should begin four spaces below the summary using full margins.

MAJOR HEADINGS: Papers must include the major headings: Methods, Results, Discussion, Acknowledgments and References. Capitalize first letter, underline, and center headings on width of typing area. Other headings should be arranged to indicate their relative importance. Headings for review articles should be arranged to increase clarity.

SYMBOLS AND FORMULAE: This material must be typed.

TABLES: Tables should be typed within the main body of the manuscript, but set apart, to avoid confusion with the text. The word TABLE, all letters capitalized, should be centered with table number (Roman numerals) above the table. Insert caption above the table, capitalizing the first letters of all main words. Place legend beneath the table. A single table must not overlap onto the following page.

FIGURES: Glossy prints or laser printed originals are accepted. Incorporate figures into the main body of text using as little space as possible without hindering legibility after a 25% reduction in the printing process. Figures should be identified in pencil on the reverse side. Place in a protective envelope and attach to the manuscript with a paper clip. Center the abbreviation "Fig." with figure number (Arabic numerals) beneath the figure and above the legend. Indent the legend on both sides to distinguish from text.

HALF-TONES (PHOTOGRAPHS): Photographs must be in black and white. A clear print, large enough to be legible after 25% reduction, is required.

FOOTNOTES: These should be typed single-spaced at the bottom of the appropriate page and separated from the text by at least a double-space and a short line immediately above.

REFERENCES: Consecutive numbers in parentheses should be used to indicate the references in the text, e.g. (1,2). The full reference should be cited at the end of the manuscript. *Single-space* between as well as within references. References should contain names of all authors in CAPITAL letters (initials typed first, surnames following), title of journal (abbreviated, if possible, in accordance with *Periodical Title Abbreviations*), volume number (underlined), first and last page numbers of article and year of publication (in parentheses) as illustrated below. References to books should contain author(s) names, in same format as above, title (underlined and first letter of main words capitalized), editor(s) names, if any, page number(s), publisher's name and location and year of publication (in parentheses). The phrase, "submitted for publication," is not considered a reference and should be placed in parentheses at the appropriate place in the text.

2. I. CREESE, Neurotransmitter Receptor Binding, H.I. Yamamura, S.J. Enna, and M.J. Kuhar (Eds), 189-233, Raven Press, New York (1985).

RUNNING TITLE: A running title of not more than 40 spaces should be provided on a separate sheet.

KEY WORDS: Three or more key words must be provided by authors for indexing of their article. Key words should be followed by enough explanatory information to make them useful to readers in a subject index, published at the end of every volume. In addition, key words will be listed on page 1 of the published article, directly below the Summary (or Abstract for *Pharmacology Letters*); these will be inserted by the Editorial Office. Abbreviated forms of chemical compounds are not acceptable. Spell out entirely, using the official nomenclature

Example: cannabidiol, effect on testicular esterase
L-dihydroxyphenylalanine (L-DOPA), effect on protein synthesis

PAGINATION: Number each page in light blue pencil in lower right-hand corner.

CORRESPONDING AUTHOR: Place at bottom of first page, under a short black line. Extend name and address across entire width of page. Please supply corresponding author's telephone and FAX number, and E-mail address if available.

FURTHER INFORMATION: The information to contributors, especially nomenclature and abbreviations, contained in the Proceedings of the National Academy of Sciences may be used as a guide for preparation of manuscripts for any points not covered above.

COPYRIGHT AGREEMENTS: Since the enactment of U.S. Copyright laws on January 1, 1978, a Transfer of Copyright Agreement is required by the publisher to accompany every article accepted for publication. Upon acceptance for publication, the corresponding author of each manuscript will be sent an agreement to be completed prior to preparation for publication.

MAILING OF COMMUNICATIONS: Contributors should submit manuscripts to:
